

`refreshStdout`

```
graph LR; A[refreshStdout] --> B[putCharTTY]; A --> C[read];
```

The diagram illustrates a control flow graph. A central node labeled 'refreshStdout' is shaded gray and has two outgoing arrows. One arrow points to a white node labeled 'putCharTTY' located above and to the right. The other arrow points to a white node labeled 'read' located below and to the right. All nodes are rectangular with black borders.

`putCharTTY`

`read`
