

`initKernelTable`

```
graph LR; A[initKernelTable] --> B[allLockPage]; B --> C[initPage];
```

The diagram illustrates a three-step process flow. It begins with a box labeled 'initKernelTable' which has a light gray background. A blue arrow points from this box to a second box labeled 'allLockPage' with a white background. Another blue arrow points from the 'allLockPage' box to a third box labeled 'initPage', also with a white background. All boxes have a thick black border.
